
Noble Wordsmiths

Dear Noble Customer,

Introducing the Noble Wordsmiths Document Upload Service

Upload PDF's and advertising onto the web for easy viewing via a Website or Social Media. PDF Products such as brochures (NW Advertising Brochure) can be easily viewed in web browsers allowing potential customers to view your products, with the added option to download the file if they wish.

PDF documents look just like they would if printed, but unlike printed documents, PDF files can contain clickable links and buttons, Form fields, Video, and Audio, creating a much more interactive experience. When you share a PDF file, virtually anyone can read it using a web browser, Adobe Reader software, or the Adobe Reader mobile app.

Organisations that do not have a website can benefit from having online files such a manuals, posters, magazines, information sheets, and so on, that can be accessed through social media sites.

Each file uploaded has a unique shortlink address (URL) that can be used to link to your online documents. Simply by pasting your shortlink code into your Facebook and Twitter status updates, creating an easily accessible document that acts as a separate webpage.

Standard rate is £2 per document, [Terms and Conditions](#) apply. For more Information contact
